

Train your crew on your own emergency without stopping the line.

Your crew practices your own procedures, on your own site. Short sessions fit into a shift change.

IMMERSION IN MOTION • THE SOUTHERN UNIVERSITY MOBILE CAVE, PRESENTED WITH XR JAGS • GRAND OPENING IN BATON ROUGE, DATE TO BE ANNOUNCED

A worker practices a plant task inside the CAVE. AI-made image.

• WHAT YOU GET

Practice the hard day on your own site.

Your people do your own task, see the result, and do it again.

FIRST STEP

A 20-minute demo at your site

Your trainer and two or three of your people try a scenario from your field. We debrief together.

HOSPITALS AND HEALTH

Rehearse the rare case

A short on-site session built around the case your team most wants to rehearse, close to the floor.

ALL CLIENTS

Cost spread across learners

One Mobile CAVE serves many sites and fields, so no single site carries the whole cost.

PLANTS AND CONTRACTORS

Mistakes cost nothing

Your crew rehearses its own shutdown and hazards in simulation, not on the floor. Run a drill as often as needed.

PUBLIC SAFETY

Test your own crisis plan

A drill in 3D built on your plan, for your leaders and responders, without the cost of a live exercise.

• HOW IT WORKS WITH THE MOBILE CAVE

A demo, then a pilot with one measured result.

01 We ask first

What stops you from training more people in your field?

02 We come to your site

A 20-minute demo on your site, with your trainer and a few of your people.

03 Agree on one scenario

We debrief together and agree on one scenario from your own work, worth building for your crew.

04 Run a pilot

One team, one scenario, one measured result. You choose the team and the skill. We agree on what to measure before we start, and we report what happened, good or not.

Your pilot scenario is chosen with you after the demo, then built or licensed with you.

In the CAVE: your own emergency, rehearsed by your own team. AI-made image.

• THE FACTS

What is set today.

• Confirmed

- The grand opening will be at Southern University, Baton Rouge; the date will be announced.
- The Mobile CAVE lists eight training fields: K-12, crisis, emergency, healthcare, technology, research, manufacturing and drones.
- Research: a PwC study found VR learners trained up to 4 times faster, in a leadership course for new managers.

• THE ASK

Book a 20-minute demo at your site.

Tell us where you are and what stops you. The last question on the form tells us which scenario to build for you.

Page online: immersion-in-motion.vercel.app/clients/

CAVE means Cave Automatic Virtual Environment. The truck CAVE uses 3D glasses. The 3D printer belongs to the AM Lab, not the truck. Seven sub-projects. Eight training fields. Eight audience pages for twelve kinds of organizations. Grand opening at Southern University, Baton Rouge, date to be announced. **Pictures of the truck are AI-made images**, not photos of the real truck. Photos of people and the CAVE room are real.
