

- FOR UNIVERSITIES WITH A FIXED CAVE, VISUALIZATION OR XR LAB, AND NO MOBILE UNIT YET • SOUTHERN UNIVERSITY MOBILE CAVE, PRESENTED WITH XR JAGS

# Your lab builds the training. Together we run it at more sites.

Many campuses run strong immersive labs that people must travel to. Southern University made its CAVE mobile, so discipline training can run where people are. Let's learn from each other and reach more people together.

IMMERSION IN MOTION • THE SOUTHERN UNIVERSITY MOBILE CAVE, PRESENTED WITH XR JAGS • GRAND OPENING IN BATON ROUGE, DATE TO BE ANNOUNCED

A curved CAVE screen. AI-made image, not a photo of the real truck.

## • WHAT YOU GET

### Six ways your lab's discipline can reach more sites.

You keep your lab and your field. We add more sites. Nobody has to start over.

## CONTENT

### Your scenarios at new sites

A scenario your team built for your discipline can run at sites across Louisiana, with your name on it. Each one is licensed with you first.

## GRANTS

### Joint proposals

A fixed lab plus a mobile one makes a stronger multi-campus proposal. Six of our seven sub-projects are tied to a Southern University or CAAV program, and SP-07 is the student team that runs the Mobile CAVE.

## REACH

### Co-hosted stops

We can hold a joint demo day near your campus, so people who never visit your lab can try immersive training in your field.

## KNOW-HOW

### What it takes to go mobile

Power, set-up time, staffing, weather, parking. We share what we learn running a mobile CAVE, with partners first.

## RESEARCH

### A shared network

Exploratory research (SP-04) is aligned with the CAAV National Visualization Network. Faculty and students can study learning outside the lab.

## A MODEL

### A path to your own unit

If you want a mobile unit of your own, we can walk you through how Southern University got here.

## • HOW IT WORKS WITH THE MOBILE CAVE

# Lab to lab, in four steps.

### 01 A 20-minute call, lab to lab

What do you run, who comes to you, and who never can?

### 02 Compare notes

Content, formats and hardware. We find one thing worth doing together.

### 03 One pilot

One shared scenario, one co-hosted stop, or one joint proposal.

### 04 Share findings

We write up what worked and share it with you first.

Content sharing is agreed in writing, case by case.

Inside the Mobile CAVE: calibrating the CAVE walls and the equipment rack. AI-made image, not a photo of the real truck.

## • THE FACTS

# What is set today.

### • Confirmed

- The grand opening will be at Southern University, Baton Rouge; the date will be announced.
- The Mobile CAVE lists eight training fields: K-12, crisis, emergency, healthcare, technology, research, manufacturing and drones.

## • THE ASK

# Let's connect our labs.

Use the form on the main page and choose “Partner with you,” or email us directly.

**CAVE** means Cave Automatic Virtual Environment. The truck CAVE uses 3D glasses. The 3D printer belongs to the AM Lab, not the truck. Seven sub-projects. Eight training fields. Eight audience pages for twelve kinds of organizations. Grand opening at Southern University, Baton Rouge, date to be announced. **Pictures of the truck are AI-made images**, not photos of the real truck. Photos of people and the CAVE room are real.
