

Show real skill in your field before the first interview.

Your program brings the people and the field. We build a safe place to practice it, at your site.

IMMERSION IN MOTION • THE SOUTHERN UNIVERSITY MOBILE CAVE, PRESENTED WITH XR JAGS • GRAND OPENING IN BATON ROUGE, DATE TO BE ANNOUNCED

The Mobile CAVE drawn as a blueprint: the lab your participants step into. AI-made image, not a photo of the real truck.

• WHAT YOU GET

Training in the field your people are entering.

People with real skills need a way to show them before the first interview.

WORKFORCE AND VETERANS

Skill-demonstration sessions

For veterans and job seekers. A veteran or trainee can show real skill in the discipline they are training for, before the first day on site.

REENTRY AND WORKFORCE

A pathway for your learners

The AM Lab pathway takes learners from schools, community groups, workforce centers, reentry programs and direct applications.

STEM OUTREACH

STEM nights

For youth and family programs: STEM nights and career exposure close to home.

MOBILE AND VISUALIZATION LABS

A shared network

Exploratory research (SP-04) is aligned with the CAAV National Visualization Network.

• HOW IT WORKS WITH THE MOBILE CAVE

We plug into what you already run.

01 A 20-minute conversation

We ask what stops the people in your program from training more.

02 Pick a session

Skill demonstration, a STEM night or a field-specific scenario.

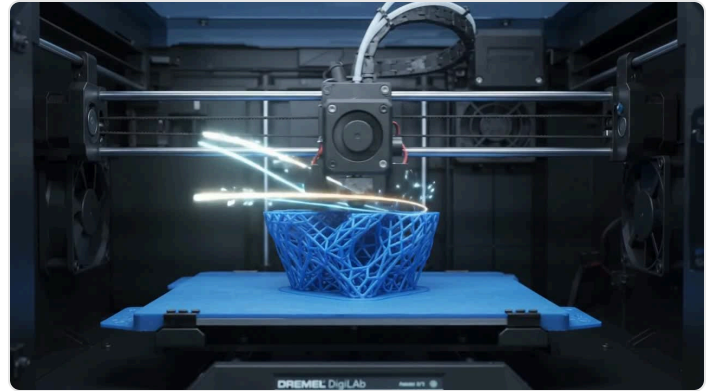

03 Training runs at your site

Your people do the task in their own field, see the result, and do it again.

04 Share findings

We share what we learn with partners first.

Each specific scenario is built or licensed with you before your demo.

A 3D printer on the AM Lab pathway builds a part. AI-made image.

• THE FACTS

What is set today.

• Confirmed

- The grand opening will be at Southern University, Baton Rouge; the date will be announced.
- The Mobile CAVE lists eight training fields: K-12, crisis, emergency, healthcare, technology, research, manufacturing and drones.

• THE ASK

Let's build training for your field.

Use the form on the main page and choose “Partner with you,” or email us directly.

Page online: immersion-in-motion.vercel.app/workforce-programs/

CAVE means Cave Automatic Virtual Environment. The truck CAVE uses 3D glasses. The 3D printer belongs to the AM Lab, not the truck. Seven sub-projects. Eight training fields. Eight audience pages for twelve kinds of organizations. Grand opening at Southern University, Baton Rouge, date to be announced. **Pictures of the truck are AI-made images**, not photos of the real truck. Photos of people and the CAVE room are real.
